# Jarod Romankiw

Jarod Romankiw is a manager on the Strategy & International team for Raytheon, an RTX business. In this role, he is responsible for partnering with strategy executives to develop data driven strategies, messaging, and recommendations for the most critical strategic issues facing Raytheon.

While in Strategy, Jarod has been part of several projects of varying scale. He served as Chief of Staff for the implementation lead during business unit realignment<sup>1</sup>, supported talent attraction/retention strategies in partnership with human resources and developed an engineering alternate site strategy leading to establishment of a facility in a new geographic region<sup>2</sup> for Raytheon.

Jarod, who has a background in aerospace and mechanical engineering, started his career at Raytheon Technologies in the Engineering Leadership Development Program. He served in both engineering and finance disciplines during the rotational program, gaining experience in design engineering, earned value management, and bidding/proposals.

Prior to joining LDP, he held several internships across the aerospace industry including engineering roles at Pratt & Whitney and Gulfstream Aerospace.

Outside work, Jarod is an avid cyclist and passionate about landscape photography.

Jarod holds a master's degree in mechanical engineering and a bachelor's degree in aerospace engineering, both from the Worcester Polytechnic Institute.
